The image features a scenic mountain landscape with a dense forest of evergreen trees in the foreground and a range of rugged, snow-dusted mountains in the background under a clear blue sky with a few wispy clouds. The CamelBak logo is centered in the middle ground, rendered in white. The logo consists of the word "CAMELBAK" in a bold, sans-serif font, with a horizontal line underneath the letters "A", "M", "E", "L", "B", and "A". A registered trademark symbol (®) is located at the top right of the letter "K".

CAMELBAK®

CAMELBAK®

AN IDEA BORN FROM THE MOST BASIC HUMAN NEED

CamelBak was established in 1989 after the company's founder made a prototype using an IV bag of water and a tube sock, inventing the first hands free hydration solution designed especially for cyclists needs. A lot has changed since then, except Camelbak's thirst for innovation and quality. Today CamelBak is a household name and market leader in the hydration category with a wide range of drinkware products.

STANLEY®

BUILT FOR LIFE.

The Stanley brand has a rich 100+ year history. Born from inventor William Stanley Jr. who forever changed the way hot drinks were consumed, in 1913 he fused vacuum insulation and the strength of steel in one portable bottle, inventing the all-steel vacuum bottle we know and love today. In the century since, his vacuum bottle evolved from concept to icon and has become an essential part of workdays, road trips and outdoor adventures.

Conscious living is at the origin of Originalhome.

Designing their collection with respect for the planet and people, Originalhome's mission is to create products that are original and contribute to a social cause.

WASTE COTTON

The waste cotton comes from leftover cotton fiber from the cotton industry. The raw material is collected at cotton spinning mills or at cotton processing factories where they use cotton for products such as make-up pads and swabs.

LOCAL SOURCING

In Bangladesh, the cotton is recovered in the area of Dhaka city and spun and weaved in a small village in the northern rural area. The waste cotton in Indonesia is recovered in Central Java, around 60 km from the workshop. If not recovered, the waste cotton will probably end up in landfills or even openly dumped in nature or the ocean, harming the biodiversity around it.

An advertisement for Waterman Paris. The central focus is an open, lined notebook with a dark cover, resting on a light-colored, textured surface. A dark blue pen with gold accents lies horizontally across the bottom right page of the notebook. In the background, slightly out of focus, is a gold-toned watch with a mesh bracelet and a dark face, and a dark blue pen with gold accents. To the left, a silver paperclip is visible. The overall aesthetic is clean, professional, and elegant. The text 'WATERMAN' is written in a large, white, serif font across the middle of the notebook, with 'PARIS' in a smaller, white, sans-serif font directly below it.

PARIS

The image features a large, light blue circular graphic on the left side, which overlaps a background image of a notebook and a pen. The notebook is open, showing lined pages, and a dark pen with gold accents is resting on it. The background image is slightly blurred, focusing attention on the text. The Waterman Paris logo is centered in the upper right quadrant, with 'WATERMAN' in a large, white, serif font and 'PARIS' in a smaller, white, sans-serif font below it.

For almost 40 years, Case Logic has developed and designed great bags and cases for handheld electronic devices. Beginning with just two audiocassette storage cases, they helped to create and expand the growing field of audio storage. Music may have changed, technology has evolved, and the word “mobile” has taken on a whole new meaning.

With products such as laptop bags, daypacks for school, university and work, tablet cases, laptop sleeves and camera bags, they balance performance and style for a mobile life in an urban environment.

CASE LOGIC INVIGO

The Case Logic Invigo line is designed for the young professional.

Nearly every element of the Case Logic Invigo Collection has been built with recycled materials, giving new life to old discarded plastics without compromising style. All of the bags are made of 100% recycled exterior fabric, interior linings and mesh, and packaging as well as partially recycled trims.
